

Innovative • Adaptable • Experienced • Reliable

WHO WE ARE

Discovery Flexibles is one of the UK's leading flexible packaging converters. Based in Scotland, we have been an integral part of the packaging industry for nearly 60 years.

We specialise in the conversion of films, paper, aluminum foil and laminate structures and we believe our experience allows us to provide our customers with superior service and product quality to that of our competitors.

Built on a strong tradition we constantly strive to be ahead of the competition through innovative product development and methodology. Over the years we have grown both organically and extensively to become one of the biggest packaging companies in the UK.

WHY CHOOSE DISCOVERY?

WHAT WE OFFER

Laminates

Available as two and three ply structures combining materials such as film, foil and paper.

Lidding Films

Produced using Polyester (PET) offering excellent tensile strength and optimum barrier properties.

VFFS & HFFS Printed Film

Supplied as a single or a laminate structure, suitable for all types of filling machinery within food, beverage and pet food sectors.

Specialised Coated Films

A full range of coatings such as Coldseal, PVdC, Acrylic, Peelable, Weld Heat Seal and bespoke applications.

Clear OPP / Unprinted Films

A standard range of plain OPP films widely used in the food industry such as bakeries and snack foods.

INNOVATIVE PRODUCTS

Print & Form

Bespoke printed trays available in up to 9 colours printed inside/outside or both surfaces.

ePlex-Lid

A truly universal mono-layer lidding film for all tray types including foil.

Perfectus

A unique lidding solution aimed at reducing the need for secondary packaging whilst maintaining the integrity of the product.

FlexiTop

An innovative lidding solution providing environmental, operational and security advantages over traditional ready meal packaging.

nanoLam

An ultra thin laminate that brings together the benefits of Aluminium Foil combined with weight reduction and yield increase.
